

Nexus Standard MP
The one metal detector that
have exceeded
the capabilities of its own kind.

A black and white photograph of the Nexus Standard MP metal detector. The detector consists of a circular search coil at the top, connected by a long shaft to a control unit. The control unit has a handle and a display panel with various knobs and buttons. A separate, larger view of the control unit is shown in the bottom right corner, highlighting its features. The background is a light, textured surface.
